Professional Summary

AWS Certified Cloud Practitioner with 2 years of professional experience building and operating production cloud infrastructure and full-stack applications. Experienced with Linux, Docker, AWS, CI/CD pipelines, networking fundamentals, and debugging distributed applications. Passionate about infrastructure reliability, automation, and solving complex production problems.

Technical Skills

Languages: JavaScript, Python, Java, Bash

Operating Systems: Linux (Debian/Ubuntu), UNIX Command Line

Networking: TCP/IP, DNS, HTTP/HTTPS, Load Balancing, Reverse Proxy, CloudFront, Route53

Cloud: AWS ECS, ECR, EC2, S3, CloudFront, IAM, Lambda, Route53, ALB, CloudWatch

DevOps: Docker, Jenkins, Git, GitHub, Linux, CI/CD

Database: MongoDB, MySQL, SQL

Professional Experience

Software Engineer – Tomasi Design

2023 – Present

- Built and maintained a production MERN e-commerce platform deployed on AWS.
- Migrated the application from a monolithic deployment to a cloud-native AWS architecture using ECS, ECR, CloudFront, Route53, and Application Load Balancer.
- Reduced first-page load time by **48%** through CloudFront caching and optimized asset delivery.
- Reduced S3 storage costs by **60%** by building an automated AWS Lambda image optimization pipeline.
- Designed and maintained Docker-based CI/CD pipelines using Jenkins for repeatable production deployments.
- Owned AWS infrastructure, application deployments, monitoring, security configuration, and cloud cost optimization.
- Diagnosed and resolved production deployment, networking, and infrastructure issues across cloud services.
- Built the company's first production-ready online platform from concept to deployment.

Projects

Tomasi Design E-Commerce Platform – Production MERN application with AWS-hosted assets, secure authentication, Stripe integration, responsive UI, and cloud-native deployment.

Serverless Image Compression Pipeline – AWS Lambda + S3 automated image optimization.

Production AWS Deployment Infrastructure – ECS, ECR, ALB, CloudWatch, IAM, Route53 deployment architecture.

Automated Analytics & Monitoring Platform – AI-powered analytics platform integrating PostHog, OpenAI, Telegram, and AWS to automatically generate business insights and performance reports.

Interactive Developer Portfolio – Modern React and JavaScript portfolio featuring responsive design, animations, project showcases, SEO optimization, and performance-focused architecture.

Relevant Coursework / Concepts

- Computer Networks
- Operating Systems
- Database Management Systems
- Data Structures & Algorithms

Certification

AWS Certified Cloud Practitioner

Education

Bachelor of Computer Applications (Expected 2026)
Navrachana University 79.9%
