

## ARPAN RAJ

### AWS Cloud Engineer | Full Stack & DevOps Specialist

Delhi, India | | [workwitharpanraj@gmail.com](mailto:workwitharpanraj@gmail.com)

LinkedIn: <https://www.linkedin.com/in/arpanraj> | Portfolio: <https://arpanraj.space/>

## PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner and Lead Software Engineer with proven expertise in designing, deploying, and maintaining scalable cloud-native applications and DevOps automation pipelines. Single-handedly architected and managed the production cloud infrastructure for a US-based e-commerce firm, delivering scalable AWS deployments, CI/CD automation, AI-powered analytics, and cloud-native MERN applications. Experienced in containerisation, server-less computing, DevSecOps best practices, and end-to-end software delivery.

## TECHNICAL SKILLS

**Cloud & Infrastructure:** AWS (EC2, S3, CloudFront, Lambda, IAM, ECS Fargate, ECR, Route53, ALB, CloudWatch, CloudFormation)

**DevOps & CI/CD:** Docker, Jenkins, GitHub Actions, Linux Administration, Git, Automated Deployments

**Full Stack:** JavaScript, React, Node.js, Express.js, REST APIs, MERN Stack, HTML5, CSS3

**Databases & Analytics:** MongoDB, Mongoose, PostHog (HogQL), OpenAI & Gemini API Integration

**Security:** OWASP Top 10, Web Application Security, Burp Suite

## PROFESSIONAL EXPERIENCE

TOMASI | New York, USA (Remote)

Lead Software Engineer & Cloud Architect | 2024 – Present

- Designed, deployed, and maintained AWS production infrastructure using ECS Fargate, ECR, ALB, Route53, CloudFront and CloudWatch.
- Built Jenkins and GitHub Actions CI/CD pipelines for automated Docker deployments.
- Developed the complete MERN e-commerce platform with secure authentication and Stripe integration.
- Engineered an AWS Lambda + S3 server-less image optimisation pipeline.
- Developed an AI analytics platform integrating PostHog (HogQL) with Gemini/OpenAI APIs to generate automated business insights.

- Applied OWASP security practices and performance optimisation across the platform.

## FEATURED PROJECTS

### AI Analytics & Reporting Automation Platform

- Integrated PostHog (HogQL) with LLMs and AWS to automatically generate actionable business insights.
- Containerised and deployed services using Docker, GitHub Actions and AWS ECS Fargate.

### Serverless Image Compression Pipeline

- Event-driven AWS Lambda micro-service triggered by S3 uploads for automated image compression.

### Tomasi Design E-Commerce Platform

- Production MERN application with Stripe payments, secure authentication, responsive UI and AWS-native deployment.

### Interactive Developer Portfolio

- Built <https://arpanraj.space> showcasing projects, responsive UI, SEO optimisation and cloud deployment architecture.

## EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA) | Navrachana University (7.87CGPA)

AWS Certified Cloud Practitioner | Amazon Web Services

Senior Secondary (CBSE) | Bright Day School, Vadodara

Secondary (CBSE) | Bright Day School, Vadodara
